DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 1, 3, 4, and 6 are rejected under 35 U.S.C. 102(a) as being anticipated by Chien et al. (6,439,835).

Chien discloses an impeller for a multistage centrifugal pump, having a disk-like main plate 712, a blade 71 joined to the main plate, and a side plate 711 having a suction port, characterized in that a boss hole is formed in a central portion of the main plate for attaching a 72 boss which engages with a pump shaft to the boss hole, wherein a step portion is formed around the boss hole (Fig. 4), the step portion constituting means for forming a gap so that when a plurality of main plates are piled on one another, the gap is formed the step portions of adjacent main plates to prevent the adjacent main plates from being adhered to each other; and a radially inner end portion of the blade which is joined to the main plate is rounded near a portion at which the blade is joined to the main plate (Fig. 4).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chien et al.

Chien discloses all the limitations except the gap is not set to be in a range of 0.3 to 0.4 mm as claimed.

Since the applicant has not disclosed that having the gap being set in the range of 0.3mm to 0.4 mm solves any stated problem or is for any particular purpose above the fact that the gap is formed when a plurality of main plates, each with a step portion formed around the boss hole, stacked one on top of another, and it appears that the impeller of Chien would perform equally well with the shape and dimensions as defined claimed by applicant, it would have been an obvious matter of design choice to modify the impeller of Chien by utilizing the specific dimensions as claimed.

Prior Art

The prior art made of record but not relied upon is considered pertinent to applicant's disclosure and consists of 2 patents.

Chien et al. (6,220,819) and Jensen (3,440,968) are cited to show different multistage centrifugal pumps.

Conclusion

6. Applicant's amendment, which introduce the limitation of the step portion constituting means for forming a gap, necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
